Leitboy for tunnel

Extreme conditions in tunnels make exceptional high demands on the attention of motorists. It's a matter of visibility: the better the object can be seen, the clearer the guidance of traffic.

Our tunnel marker is used as a guide assistant on the right or left side of the

roadway. Additionally in many cases it is installed to make dangers like curb stones and others visible inside or outside of tunnels. It is sheeted with highly reflective diamond grade material. Cleaning is simple and quickly.
